

INTERDISCIPLINARY PROCEDURES

For the proper management & rehabilitation of Cleft Lip/Palate patients an Interdisciplinary Procedures is required both before and after surgery.

The following are the disciplines required:

Social Worker	Pediatrics
Speech Pathology	General Pediatric Dentistry
Audiology	Orthodontia
Plastic Surgery	Otolaryngology
Neuro Surgery	Anesthesiology
Ophthalmology	Genetic Counseling
Psychology	Parents Support Group

We presently have half of these already in place and will complete the full configuration and house all these disciplines in our new two storey building at East Avenue by March 2006.
